

IGGM: ARC Raiders Blueprints Farming And Buying

Autor: jackqoe3@gmail.com - 2026/02/10 02:52

In ARC Raiders, Blueprints are one of the core resources that determine a player's power ceiling. Whether you want to unlock powerful weapons, craft high-tier equipment, or gain an advantage in late-game Raids, ARC Raiders Blueprints are indispensable.

Many players encounter the same problem in the mid-game: Blueprint drops are random, and they spend a long time grinding but still lack crucial blueprints. Even if they are lucky enough to collect them, failing to successfully extract means they might lose everything.

This is why more and more players are choosing to buy ARC Raiders Blueprints directly through IGGM, using a more stable and time-efficient method to improve their strength.

What are ARC Raiders Blueprints?

Blueprints are special items that permanently unlock crafting recipes. When a player obtains a Blueprint in the game, they can select "Learn & Consume" at the base. After successfully learning it, the weapon or item will be permanently added to the player's crafting list. The same Blueprint only needs to be learned once; if a learned Blueprint is obtained again, it can be sold directly for ARC Raiders coins. Simply put, Blueprints determine what a player can craft, while materials determine how to craft it.

How many ARC Raiders Blueprints are there?

ARC Raiders Blueprints is approximately 70+. These mainly include weapons, throwable items and traps, advanced tools, weapon attachments, and special functional equipment. While owning blueprints doesn't instantly make you stronger, without them, you'll be severely limited in the game. This is especially true in high-difficulty areas or PVP scenarios, where the equipment gap is amplified.

How to Farm ARC Raiders Blueprints?

1. Loot Container Drops:

Most blueprints come from opening chests and containers. Weapon Cases and Raider Caches have significantly higher drop rates. Medium-sized containers like medical kits also have a certain probability. High-density areas such as breach rooms or high-level loot points are more likely to yield blueprints.

2. Missions and Rewards:

Completing certain main missions, side missions, or special events can guarantee blueprint drops, which is more stable than scavenging in the wild. This is especially helpful in the early stages of the game to quickly build your crafting foundation.

3. Special Drops:

Some extremely rare blueprints require defeating specific bosses to drop. For example, the Aphelion blueprint can only be obtained by defeating the Matriarch elite enemy. Queen series blueprints also come from specific high-difficulty events.

Common blueprints include:

Tempest - Area of effect (AOE) damage, energy attacks, and damage over time.

Bobcat - Fast movement, scouting, and evasive combat.

Wolfpack - Increases attack count, synergy, or team buffs.

Snap Hook - Improves mobility, allowing you to climb buildings, cross large gaps, and sometimes quickly reposition or escape during combat.

Looting Mk.3 (SURVIVOR) - Looting Mk.3 improves your scavenging efficiency. Increases the quality and/or quantity of loot found during raids. Players focused on farming materials, progression, and high-value extraction runs.

Blueprints determine how far you can progress in the game. Instead of gambling your time on uncertain drops, get the blueprints you need directly through IGGM: ARC Raiders market and focus your energy on the fun of combat, exploration, and gear customization.
